

Have you ever dreamed of becoming an astronaut? Could it be this dream was a critical influence in your life? Reach out for the stars and applied now!

We plan to carry out a mission to the International Space Station during the period of 2019/2020 and are recruiting for:

The first female German Astronaut

Key Tasks and Responsibilities

As the first female German astronaut, you will perform the following activities:

- Participate in the psychological and physical selection process;
- Participate in a multi-year astronaut training in Star City near Moscow and/or in Houston, Texas (USA);
- Prepare and conduct scientific experiments on the International Space Station (ISS) to study health and psychological behaviour of women in space;
- Media fundraising activities, during and after the flight;
- Public outreach presentations for schools, etc.

Skills & Experience

You will have the following qualifications and relevant experience:

- University degree in engineering or science or equivalent military education;
- Several years of experience in science, aerospace, technology, medicine or other relevant field;
- Experience with presentations and working with media;
- Medical fitness certificate, pilot license, diving license and/or similar qualifications are an advantage;
- Excellent physical and psychological fitness;
- Excellent communication and team work skills;
- German citizenship;
- Fluency in English is mandatory; knowledge of Russian is an advantage.

We are looking forward to receive your Europass CV, together with a motivation letter, certificates and a short video introducing yourself (ca. 60 seconds). Please send your application to Ms Kirsten Gibbs at astronautin@hespace.com, quoting job **DEB-2985** before **30-Apr-16**.
