Danuri photographs India's lunar explorer India's Chandrayaan-3, the first-ever lunar exploration vehicle to land on the moon's south pole, is seen in an image captured by Korea's Danuri lunar orbiter on Aug. 27. The Ministry of Science and ICT and the Korea Aerospace Research Institute (KARI) said Tuesday that the Danuri successfully photographed Chandrayaan-3 at its landing site with its high-resolution camera from about 100 kilometers away. Inset is a concept photo showing the Chandrayaan-3 lander and rover.
