## Look: It's Burj Khalifa at night from space!

Nasa astronaut captures Downtown Dubai

**DUBAI**  
**BY SAJILA SASEENDRAN**  
Chief Reporter

Nasa astronaut Donald Roy Pettit has shared a breathtaking photo of Burj Khalifa, the world's tallest building in Dubai, from the International Space Station (ISS).

Pettit posted the nighttime image of Burj Khalifa glowing distinctly amid the illuminated cityscape of Dubai. The photograph shared on Pettit's X account has captured Downtown Dubai from the lower Earth orbit. The Burj Khalifa stands out promi-

nently, its facade emitting a radiant silver hue, visibly caused by the building's distinctive design, making it one of the visible landmarks from space.

Reposted by the Mohammed Bin Rashid Space Centre in Dubai, the image, originally shared on Sunday evening, had garnered over 115,000 views by yesterday afternoon.

Pettit's Burj Khalifa space image comes shortly after Nasa's recent photograph of Dubai's dazzling city lights captured from space, which was released by the Dubai Government Media Office last week.
